

## Leakage Sensor KNX [SCN-LSEN1.01]

Using electrolytic AC voltage measurement, the MDT Leakage Sensor detects conductive liquids on the floor.

### Properties

- Adjustable delay time for “alarm” and “alarm end”
- The behaviour after the alarm ends can be set
- Additional alarm signalling by LEDs
- 1.4 m connection cable
- KNX bus coupling unit integrated
- Protection class IP 66
- Dimensions: Ø 70 mm x 24 mm

SCN-LSEN1.01

Applications for the MDT Leakage Sensor KNX include heating manifolds, heating, washing and basement rooms, as well as critical areas under terrariums, aquariums or wet cells. The early alarm in case of leakage can help to avoid major damage.
